

PEROS

Rainbrella

Why is Rainbrella the dominant brand in umbrellas?

Because nowhere else do you get the combination of range, quality, service and price.

- Stock service is our speciality
- Custom indent is our passion
- For 70 years we have been the market leader in umbrellas

Fabric Info

We use 190T Nylon as well as Polyester and Pongee across our whole range, depending on style. If you are doing a custom indent order, we can advise on the best fabric to use depending on your requirements.

Printing Info

For local printing we offer screenprinting, digital transfer, Supacolour and in Australia only, sublimation. For custom jobs, we can offer the following printing techniques in China - digital, screenprinting, sublimation/heat transfer and specialised inks (like colour changing inks when wet). Let our experience guide you and your logo to an exceptional printed result.

UPF50+ Fabrics

If you want an umbrella to protect you from the sun as well as the rain, then choose any of our silver coloured umbrellas. These have been tested by ARPANSA (Australian Radiation Protection and Nuclear Safety Agency) and are rated at UPF50+ protection.

Wind Tunnel Testing

Several of our umbrellas have been wind tunnel tested by the Facility of Engineering at the University of Auckland. Look for the "Wind Tunnel Tested" icon in umbrella description information.
